WM/REUTERS FX BENCHMARKS

THE MOST TIMELY, TRANSPARENT AND RELIABLE FX BENCHMARKS
FOR MORE THAN 150 CURRENCIES

As foreign exchange trading activity and volume grows, asset managers, banks, index publishers and other market participants need access to reliable, timely and independent FX benchmark rates throughout the day. For more than 20 years, WM/Reuters FX benchmarks have served as an objective, unbiased source for FX data and offer both intraday and closing fixes for spot rates, forward contracts and NDFs.

CLARITY AND PRECISION. EXCEPTIONAL DEPTH AND BREADTH OF COVERAGE

Without the benefit of a central exchange, FX markets can be fragmented, making it difficult to discover meaningful market rates. What's more, thin markets have long been the norm for all but the most widely traded currencies.

This creates significant challenges. Measuring portfolio performance, settling derivatives, publishing indexes and structuring financial products becomes increasingly difficult without access to reliable, standardized and widely distributed FX benchmarks.

WM/Reuters FX benchmarks provide accurate data for more than 150 currencies — distributed throughout the day and available to subscribers of Thomson Reuters EIKON and real-time feeds, plus other third-party providers.

With a published and transparent calculation methodology, the respect of central banks and national regulators worldwide and a reputation for objectivity, WM/Reuters FX benchmarks are widely accepted by auditors, align with IOSCO standards, and have been adopted by leading equity and bond publishers including MSCI, FTSE, S&P, JPM and STOXX.
