SEE MORE OF THE PICTURE WITH ALTERNATIVE DATA

What you get with the BattleFin Refinitiv partnership

Establishing itself as the vital other side of the fundamental data coin, alternative data is a crucial counterpart to high-quality fundamental data. To make the combination of alternative and fundamental data easier for our clients, we’ve teamed up with leading alternative data provider BattleFin.

Our partnership with BattleFin provides clients with access to one of the largest libraries of alternative data available globally. As the partnership develops, we continue to add third-party alternative data into Refinitiv® Quantitative Analytics as well as providing our own alternative data.

LinkUp data

Companies know more about their internal conditions and customer demand long before external buy-side and sell-side analysts do; company job openings data might prove invaluable to investment strategies.

With the largest and highest-quality job listings index of job openings sourced direct from company websites globally, LinkUp has become a leading provider of job market data and analytics. LinkUp data delivers unrivaled insights into the global job market.

LinkUp data consists of three distinct components:

- Individual job listings: Contain every data field for each job except its full-text description
- Individual descriptions: Contain the complete text-based job description for every job listing in the LinkUp index
- Core analytics: Contain 20 core macro, sector and micro analytics that are calculated and updated daily
