

# PROFESSIONAL SERVICES

## FX trading: workflow implementation and product deployment

Traders need platforms that offer optimal transparency, maintain equal access to liquidity and improve their efficiency. They also need post-trade solutions that are supported by industry experts.

The Refinitiv® FX Trading Post-Trade Implementation service package is designed to provide comprehensive support for requirements of the entire FX ecosystem. Our services handle all implementation needs, including requirement analysis, design, proof of concept, technical and functional set-up, documentation and handover.

### About Professional Services

Professional Services is a global in-house team of business and technical consultants, engineers and project managers who deliver human and technical expertise to help you maximise the value of Refinitiv products and services.

Our group have a deep knowledge and understanding of Refinitiv's data and our clients' infrastructure. This enables us to support your workflow needs. Professional Services packages aim to reduce the effort, timelines and costs for you from the start of service subscription to adoption.

### Service package overview

FX Trading is the integration of all the best FX capabilities available from Refinitiv into a single FX transactions platform – including Refinitiv® FXall. The Professional Services team have deep knowledge of our post-trade products, from FXT adaptors and Refinitiv® Trade Notification to Refinitiv® Deal Tracker® Suite. We work to understand your complex FX workflow and STP needs and deliver a range of supporting services that allow you to operate effectively in the ever-changing FX market.

**Understanding your workflow needs:** Our team of consultants begin by analysing your environment, gaining a clear understanding of your requirements, which helps in providing the necessary insight and recommendations to cover existing gaps and achieve straight-through processing (STP).

**Project management:** Our team will ensure that the corresponding post-trade components work with the new FXT platform, while our consultants deploy and support the testing of all Refinitiv post-trade components involved, including the respective workflows.

**Proven methods of post-trade implementation:** We provide installation, configuration and upgrade support for key adaptors, FX Trading desktops and other Refinitiv post-trade services. This also includes resourcing assistance to absorb workload overages and reduce risk.
