We are now Refinitiv, formerly the Financial and Risk business of Thomson Reuters. We’ve set a bold course for the future – both ours and yours – and are introducing our new brand to the world.

As our brand migration will be gradual, you will see traces of our past through documentation, videos, and digital platforms.

Thank you for joining us on our brand journey.
For more than a quarter of a century, Thomson Reuters has been designing, calculating, governing and publishing financial benchmarks that lie at the heart of the global financial system.

Thomson Reuters calculates and publishes more than 300 OTC benchmarks in 90 countries. We are the administrator of more than 30 key rates, including WM/Reuters, Canadian Dollar Offered Rate (CDOR), Canadian Overnight Repo Rate Average (CORRA) and Saudi Arabia Interbank Offered Rate (SAIBOR).

Thomson Reuters provides: Calculation, Governance and regulatory Administration.

**Calculation**
- We calculate the benchmark rate on behalf of benchmark owners based on contributions from banks or traded data
- We publish the data on Thomson Reuters Eikon®, Elektron and/or other Thomson Reuters platforms
- We distribute this data via 3rd party vendors

**Governance**
- Where Thomson Reuters calculates the benchmark on behalf of an Administrator, we can also support the Administrator’s responsibilities
- We perform activities to govern benchmarks to satisfy multiple regulatory obligations (IOSCO, EU/BMR and MAR) such as:
  - Reviewing methodology
  - Providing quality assurance KPI that show the accurate determination of the benchmark
  - Providing surveillance and monitoring to identify potential attempts of manipulation
  - Managing the control framework
- We provide the output data, and analytics to the Administrator.

**Administration**
- As the Administrator, we carry the regulatory responsibility of the integrity of the benchmark
- We are accountable to the regional regulators
- We communicate and engage with regulators, panel banks and clients to ensure compliance
- We ensure that benchmarks continue to be compliant and follow best practices globally
What sets us apart

**Trust and Integrity**
Central banks, national regulators and local authorities around the world look to Thomson Reuters as the preeminent provider of benchmark services due to our peerless reputation.

We are regularly asked for guidance in reform work related to the benchmark industry.

**Global Experience**
Thomson Reuters has over 30 years of experience in the benchmarking industry. We administer more than 30 benchmarks in markets as diverse as Canada and Saudi Arabia.

Over 300 benchmarks are available on TR products and more than 80 benchmarks are calculated by TR. Our benchmarks cover multiple asset classes; interest rates, FX, derivatives, mortgages and others.

**Strict Adherence to Regulation**
Our compliance and benchmark team are working together to ensure that all benchmarks we administer are fully adherent with IOSCO and EU BMR standards.

To facilitate compliance with the UK Financial Conduct Authority (FCA) and the EU Benchmark Regulation, Thomson Reuters created a separate FCA-regulated subsidiary, Thomson Reuters Benchmark Services Limited (TRBSL) in 2014.

TRBSL is Authorized as a Benchmark Administrator by the FCA under the EU Benchmarks Regulation (EU BMR), and all Thomson Reuters benchmarks are IOSCO adherent, FCA approved with separate teams to manage and monitor content and data integrity.

TRBSL ensures the integrity of the data and processes which go into our benchmark rates and services.

We have set industry-leading standards for administration and calculation and partnered with regulators, banks and local authorities to improve and protect confidence in the benchmark industry.

Over 300 benchmarks are available on Thomson Reuters products and 87 benchmarks are calculated by Thomson Reuters. Our benchmarks cover multiple asset classes; interest rates, FX, derivatives, mortgages and others.

**Unparalleled Global Infrastructure**
Thomson Reuters employs 45,000 people and has operated in more than 100 countries for more than 100 years. Our global customer support channels are supported 24/7 by 4,500+ team members in 19 different languages.
