

# INTEGRATED TRADING WORKFLOW

Enhanced end-to-end efficiency from pre- to post-commodities trading

## Addressing potential risks

Increasingly complex data and information access often requires commodities traders to utilize disparate systems for pre-trade research, decision making and actual trading or order execution.

Not only does this affect the costs in using and maintaining different systems, but the time, resources and divided focus on using diverse interfaces all add up to create inefficiencies throughout the workflow. Furthermore, access to exchange data in different visualization softwares often means paying for the same data twice. Added to the cost and efficiency drop is the element of risk associated with parallel running of multiple complex systems to support the crucial day-to-day workflow of your teams.

In this environment of squeezed margins, can you afford these often hidden losses and take on the risk of failures at multiple points?

Refinitiv can help increase efficiencies and control costs on your commodities trading desk by allowing you to manage your execution, market data and connectivity needs through a single solution.

Refinitiv™ REDI® EMS is an advanced, award-winning execution management system that offers multi-asset trading functionality, powerful workflow and compliance tools and rich analytics, available via desktop application, cloud or API globally.

With the integration of Eikon, Eikon Messenger and the Autex® suite, REDI EMS provides a comprehensive trading solution advanced in its breadth and depth. This combination also eliminates duplicate market data costs that you might otherwise be paying.

REDI EMS provides access via API or FIX to facilitate order staging with leading OMS providers, including AlphaDesk, a cloud-based multi-asset class order management and portfolio management system.

Options trading on futures contracts.

## REDI EMS capabilities

- Single, multi-broker execution platform across futures and options products globally
- Advanced execution tools including basket and pairs trading applications for futures
- Position management, real-time P&L and multi-account allocations
- Access to over 600 broker-dealers globally
- Wide range of FIX-integrated vendor partners as well as access to Eikon App Studio content
- Software as a Service (SaaS) delivered to minimize the technology footprint

## REDI EMS features

- **Global, cross-asset coverage:** Trade futures and options across underlying asset classes: Energy, Agriculture, Metals, FX and Rates products covered
- **Powerful execution methods:** REDI EMS allows execution through broker DMA routes, algorithmic and care order capabilities
- **Full complement of trading methods:** Outrights, calendar spreads, inter-market spreads, packs, strips and bundles are supported. Ease-of-use tools bring the power of the market to the desktop
- **Comprehensive, end-to-end coverage:** A range of API and FIX connectivity supported for in-house or third-party risk and back-office systems
- **Unrivaled support:** REDI EMS provides a follow-the-sun support model offered by product experts globally, with each bringing deep understanding of electronic trading and local market structures
- **Multi-broker connectivity:** Trade on global exchanges via multiple broker counterparts from a single platform. REDI EMS currently supports 38 F&O exchanges across the globe, via a network of connected FCM partners

Speak to our experts today to start your journey towards efficient end-to-end commodities trading.
