

We are now Refinitiv, formerly the Financial and Risk business of Thomson Reuters. We've set a bold course for the future – both ours and yours – and are introducing our new brand to the world.

As our brand migration will be gradual, you will see traces of our past through documentation, videos, and digital platforms.

Thank you for joining us on our brand journey.

THOMSON REUTERS ENTERPRISE PLATFORM

PERFORMANCE. RESILIENCE. INNOVATION.

Delivering real-time market data and real competitive advantages to your firm

In today's market environment, enriching, delivering and administering large amounts of data efficiently and quickly is essential. You need a high performance market data platform that helps you meet distribution needs, manage compliance requirements and reduce total cost of ownership. You need solutions that meet your needs today, and position you to operate successfully tomorrow.

Our focus is delivering forward-thinking market data platform solutions, while helping you meet efficiencies. You can depend on this, along with the great breadth and depth of data you expect from Thomson Reuters.

Our experts provide consultation based on our expanded development resources and ongoing marketplace engagement.

Whether your needs involve greater complexity around data publishing or you simply need to rein in costs, our solutions take you where you need to go.

Choose Deployed or Managed Services

The trend toward Managed Services is continuing- and for good reason. We can remove the burden of managing your market data infrastructure, allowing you to focus on your business, while decreasing your total cost of ownership (TCO).

We offer market data, infrastructure, platform, and connectivity all delivered as fully managed services and hosted in one of our Elektron Managed Services data centers located in the key financial markets.

We also offer Deployed Managed Services. Deployed Managed Services offers a comprehensive set of managed services for solutions deployed at your site, including platform management, monitoring, 24x7 support and onsite resources and training.

Deployed Managed Services is a great first step toward a fully hosted and managed solution with Managed Services, for those who aren't able to move to a fully hosted environment immediately.

ENTERPRISE PLATFORM

Enterprise Platform is a critical part of Elektron as the means to provide core infrastructure to support both the technical integration and distribution of data, and the administrative function. The platform allows you to control the flow of information to the applications that need access to data, insight and profitable opportunities.

THOMSON REUTERS™

Benefits

REDUCE TCO ✓

We help you find solutions that reduce total cost of ownership without compromising performance. This can be done by reducing the number of boxes required to run your market data infrastructure, or saving hardware costs through managed services.

Also, eliminate excess market data spend and reduce administrative costs in managing market data entitlements.

REDUCE OPERATIONAL RISK, COMPLY WITH REGULATIONS ✓

When you need visibility of price publishing we provide solutions that address governance and regulatory requirements and help you avoid fines and reputational damage. When data is published from your firm, our solution reports who published it, and when and where it was published- and the data never leaves your site.

A HIGH PERFORMING, HIGHLY SCALABLE PLATFORM ✓

- Handle dramatically higher market data rates, while meeting business demands for lower latency
- Leverage the latest processor architectures for increased throughput
- Optimize bandwidth performance through efficient binary message transport
- Be equipped to manage complex order books, machine readable news, time series data, FIX transactions and yield curves – including content created by your in-house applications

Thomson Reuters Elektron is a suite of propositions that power the enterprise and connect global markets. Elektron delivers low latency feeds from thousands of exchange-traded and OTC markets, along with analytics, a platform and transactional connectivity to support financial workflow applications. All of these capabilities can be deployed at a customer location or delivered as a fully managed service from any one of Thomson Reuters co-location and proximity hosting sites around the globe. Elektron also powers the Company's flagship desktop, Thomson Reuters Eikon.
