League Table App

WHY SHOULD I USE THE APP?
League Table app is the next generation league table creation tool in Thomson Reuters Eikon. You can quickly and easily create Thomson Reuters' industry-standard M&A, bond, Equity and syndicated loan League Table rankings with the league table app. These widely published league tables provide insight into market trends, the ability to benchmark versus peers and provide scoring useful across many types of ad hoc internal reporting.

KEY FACTS
- The Eikon League Table App provides quick and easy access to industry standard Thomson Reuters League tables.
- This intuitive app will decrease the bandwidth requests for standard league table updates, allowing you and your colleagues to quickly create and run league tables from your desktop.
