

REFINITIV[®] REAL-TIME OPTIMIZED

Refinitiv's full range of real-time data is now easily accessible via the cloud.

Highly efficient solution

You now have consolidated access to a comprehensive set of real-time data in the cloud, available directly via our APIs or our Real-Time Distribution System (formerly known as our Enterprise Platform). Benefit from access to time series, reference data and analytics across a diverse range of asset classes and regions.

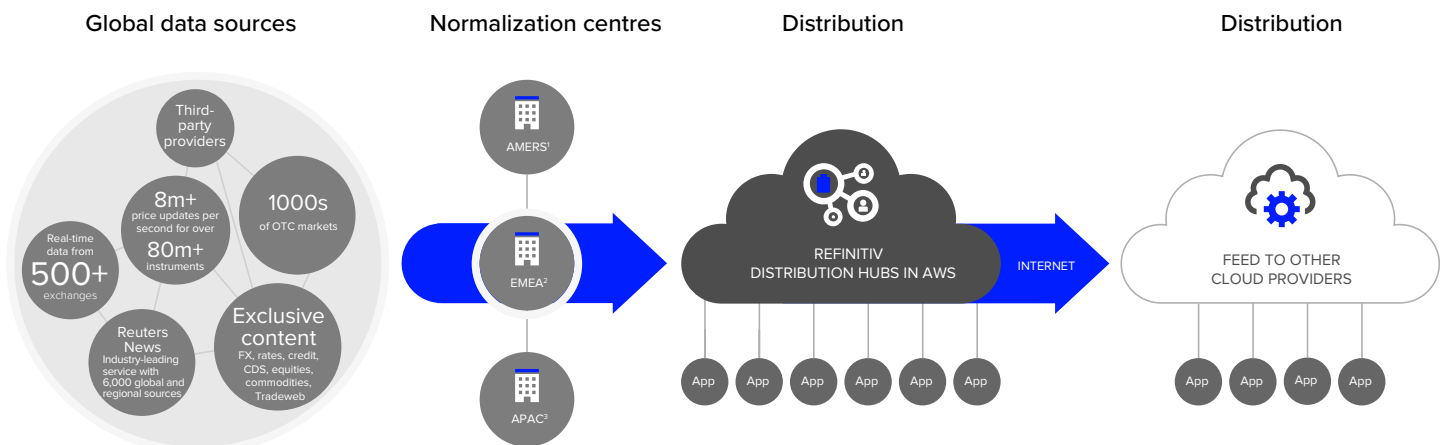

In addition to the content, our Refinitiv data model ensures you have straightforward onboarding and integration with downstream applications.

Big benefits

The feed provides you with cost-efficient access to our global, real-time exchange and contributed data. You can access it via the cloud, so there is no requirement to deploy infrastructure on-site.

With large quantities of data available for consumption, this solution can directly power up to five connections per application ID – accelerating your time to market and enabling you to be more agile in responding to market opportunities that require big, clean data and analytics.

Real-time, cloud-based data

1 AMERS: Americas

2 EMEA: Europe, Middle East and Africa

3 APAC: Asia-Pacific
