

HOW REFINITIV TICK HISTORY EMPOWERS YOUR ENTERPRISE

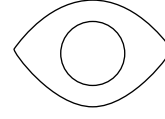

New Challenges

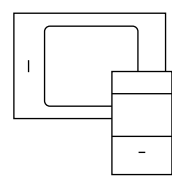

How can you effectively manage compliance requirements in today's fluid regulatory environment, perform quantitative research and analysis or develop and test real-time algorithmic trading strategies in a cost efficient manner?

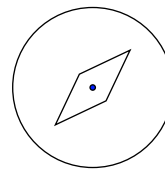

Fluid regulatory environment
(MiFID II, FRTB, MAR, PRIIPS...)

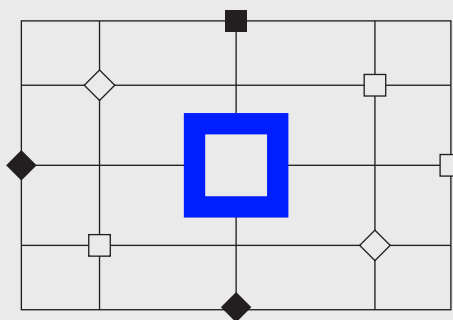

Evolving compliance requirements
(Market surveillance, back-testing...)

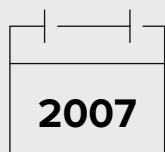

Increasingly electronic markets

Need to explore new markets to find an edge

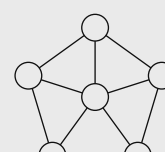

New Data Requirements

FRTB

Banks are required to look back at a period that covers the Global Financial Crisis

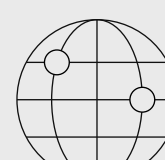

MiFID II: European venues

Including new APAs and MTFs, and third-party data for MiFID II obligations

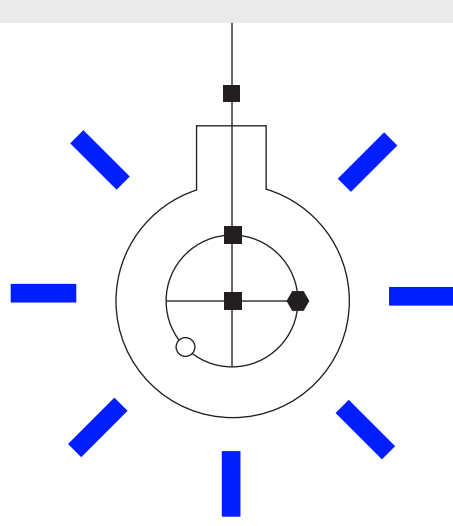

Market depth

Order book data for electronic trading signals (includes level 2 and level 3 data)

Exploring new markets

Global data that includes emerging markets, OTC and 3rd party data
