RESULTS PAGE

Re-display previously reviewed explorers and searches.

Click to display the Preview.

Reorder Result

Wholesale Price Index Austria  
The wholesale price index is revised in five year intervals since 2000 to take into account changes occurring in the underlying basket of goods and to base the calculation on current weightings. Following the latest revision, the index of wholesale price will be published and

Re-order by start date, rank, etc.

Market value / market capitalisation – datatype (MV)  
Market value on Datastream is the share price multiplied by the number of ordinary shares in issue. The amount in issue is updated whenever new tranches of stock are issued or after a capital change.  
For companies with more than one class of equity capital, the market value is expressed according to the individual issue.  
Market value is displayed in millions of units of local currency.
