

REFINITIV WORKSPACE / EIKON TECHNICAL ROADMAP

This document lists significant changes to the technical environments of Refinitiv Workspace® and Refinitiv® Eikon and the versions to which they are currently assigned. For example, when we intend to introduce or remove support for an operating system. While every effort will be made to achieve the goals set out in this roadmap, they are provisional by nature.

For information about current requirements, refer to the System Requirements documents of Workspace and Eikon.

Workspace

Desktop		1.19	1.20	1.21	1.22
Microsoft® Windows®	OS				
	Server	v2019
